

A Look At The Numbers

Managed Care Organizations Provide Value For Florida

The state of Florida partners with managed care organizations (MCOs) to serve the healthcare needs of individuals facing economic and social barriers. MCOs align with Florida requirements to deliver a higher standard of healthcare.

Public resources
Accountability
Oversight

Private sector capital
Expertise
Innovation

This partnership leads to higher quality care and improved health outcomes for Floridians enrolled in Medicaid while managing Medicaid costs.

3.5 million

people in Florida are covered under Medicaid managed care¹

77%

of Florida adults in Medicaid rated their health plan 8/10 or higher²

3 in 7

children are covered by Florida Medicaid³

MCOs enable Florida to deliver:

Spending Where It Matters

-  Florida MCOs provided estimated Medicaid savings of \$420 million in 2016 and \$441 million in 2017⁴
-  85% of premium dollars are spent on healthcare costs and quality improvement activities⁵
-  Florida MCOs are committed to reducing:
 - Potentially preventable hospital admissions by 22%
 - Hospital readmission by 21%
 - Preventable emergency room visits by 14%⁷

Higher Quality Care

-  67% of Florida's managed Medicaid program's HEDIS quality scores met or exceeded the national average⁶
-  Florida MCOs provide more than 55 additional benefits to people in Medicaid, including:
 - Substance abuse and mental health treatment
 - Alternative pain management services
 - Doula services
 - Vaccines for adults⁷
-  77% of long-term care recipients have reported that their quality of life has improved⁸

Improved Population Health

-  69% of infants had regular well-child visits with their primary care doctors in 2017⁹
-  9% increase in annual dental visits between 2013 and 2017⁷
-  90% of older adults had annual visits with their primary care doctor in 2017⁹
-  82% of pregnant women received critical prenatal care during their first trimester in 2017, compared to 71% in 2013⁹
-  78% increase in home and community based services, allowing more Medicaid members to stay in their own homes between 2013 and 2018⁷
